Washoom and Staircase Modules

(FRP) Fiberglass Reinforced Plastic

INPS manufacturing processes include hand lay-up or RTM/infused in sealed mold.

Finishing Options:
Gel Coat • Paint • Vinyl • Tedlar

REDUCE INSTALLATION TIME

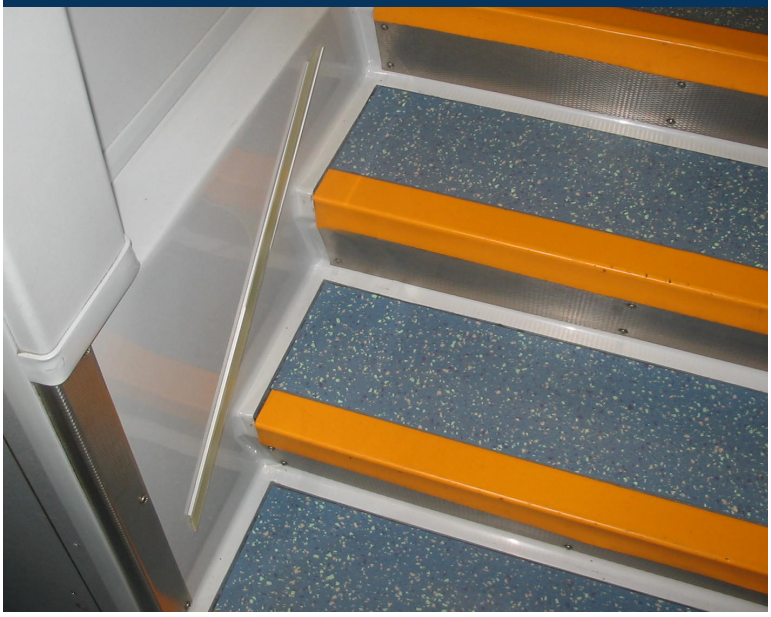
CNC-cut, prefinished panels with all required penetrations for plumbing, electrical, HVAC, and accessories.

INPS PRODUCT HIGHLIGHTS

- Modular washroom offering complete units.
- Fiberglass staircases
- Custom solutions to suit any specific customer's requirements.

Fiberglass Staircases

Fiberglass staircases are lightweight, durable assemblies used where desired to allow for elevation access. They are typically manufactured using FRP (fiberglass reinforced plastic) through hand lay-up or RTM/infusion process to provide a one-piece, corrosion-resistant structure. Composite materials are increasingly used throughout modular build applications allowing for a high strength-to-weight ratio while offering a low maintenance finish.



TRANSIT

Washoom and Staircase Modules

Materials

- Fiberglass reinforced polyester resin
- Fire-retardant resins to meet transit requirements
- Gelcoat or textured anti-slip finishes

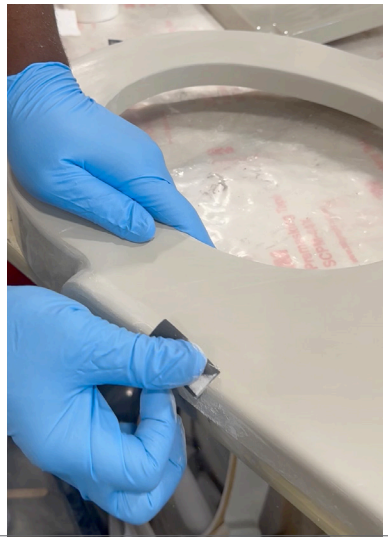
Can incorporate metal inserts and hardware for mounting handrails, lights, and threshold plates.

Custom colors and finishes to match interior décor.

Common Applications: designed to fit a confined space or location.

Features

- Lightweight construction reduces overall vehicle weight.
- Corrosion and moisture resistant compared with steel.
- Integrated anti-slip surfaces for passenger user safety.
- Low smoke and flame spread materials available to meet rail industry standards.
- Molded one-piece design with integrated ribs and mounting points.
- Easy to clean and maintain.



Washroom Modules Accessories

We manufacture and supply the following washroom-related products:

- **FRP Sinks**
- **Toilet Seats**
- **Toilet Shrouds**
- **Washroom Signage**
- **Wall Panels**

These products are available in custom textures and colors (including customer color matching). Experts in retrofitting and re-engineering washroom componentry to match fit, form and function. New design pieces according to the customer's requirements.
